

/home/gene/Work/dimmer
/main/include/led.h

```
graph TD; A["/home/gene/Work/dimmer  
/main/include/led.h"] --> B["stdint.h"]; A --> C["driver/gpio.h"]; A --> D["freertos/FreeRTOS.h"];
```

The diagram illustrates the include dependencies of the file `/home/gene/Work/dimmer/main/include/led.h`. It is represented as a root node in a gray box at the top. Three blue arrows point downwards from this root node to three child nodes, each in a light gray box: `stdint.h` on the left, `driver/gpio.h` in the center, and `freertos/FreeRTOS.h` on the right.

stdint.h

driver/gpio.h

freertos/FreeRTOS.h
